RELIGION AND SCIENCE FORM  
 THE BASIS FOR HIS BLUE SWAN THEORY

# ALFRED BOLLEBAKKER BRINGS PEACE ON EARTH

ALFRED BOLLEBAKKER USED THE MOST WIDE-SPREAD WORLD RELIGIONS AS A BASIS FOR WHAT HAS BECOME HIS "BLUE SWAN THEORY". TIME TO LET THE WORLD KNOW ABOUT HIS THEORY WHICH STATES THAT, WITH A POSITIVE OUTLOOK ON LIFE, YOU WILL ATTRACT YOUR OWN LUCK. "IN THEORY, IT COULD EVEN BRING US WORLD PEACE. NOW THAT'S A THOUGHT FOR CHRISTMAS, AS FAR AS I'M CONCERNED."

Jesus could walk on water. Muhammed proclaimed that the great Jihad happens within; he who can resist temptation shall be rewarded. Buddha did not sleep for seven days in order to be able to meditate. "That means Jesus must have had blind faith in order to achieve what he did", says Bollebakker. "Muhammed taught his

followers to achieve their own dreams and Buddha had the tenacity to follow his beliefs. So now you have the three elements which form the basis for any scientist. In order to develop my theory, I needed these elements desperately. So you see, science and religion go hand in hand. They are closely interconnected."

### Personal dream

Alfred Bollebakker needed much confidence, enthusiasm and perseverance to develop the Blue Swan Theory. Bollebakker: "I'm a researcher. In 2001, I started looking for something I didn't even know existed. My dream was to simplify everything, for everyone. How? I didn't know. It took me six years to come up with a rough outline of a theory. And now, another six years later, after a multitude of different tests, I can prove that my theory works and I am finally able to implement it all over the world. The Blue Swan theory truly works; I have experienced this myself on several projects. If you are open to opportunities and invest in them, it directs luck your way."

### World Trade Ports

Bollebakker links his theory to the World Trade Ports he is currently setting up in several locations all over the world. Here, he unites new ideas, financiers and companies, so that new projects can be started at any conceivable location. "These WTPs are the gateways to peace, as they make dreams come true. Isn't that great after so many years of war?"

There is a whole world hidden behind the Blue Swan theory which unites the faiths and sciences such that new developments and discoveries can be promoted." Even extremists can now turn to a different lifestyle, says Bollebakker. "Take the Muslims. Their leader helped me to discover the Blue Swan. Muhammed himself said that the Islamic people should devote themselves to their own dream. If they do not do this, they are in fact deserting their own leader. They must start the quest to find their own dream and achieve it. Once they realize that, the Blue Swan theory will grow bigger and bigger. Please note that there is nothing wrong with extremism, as long as it is not at the expense of others. Jesus was the biggest extremist of them all: he sacrificed himself, saving everyone in the process."

" If you are open to opportunities and invest in them, it directs luck your way "

### A present to the world

"Each religion added something to science. After Muhammed the Great had spread the Jihad, Arabic culture blossomed. The Arabs were far ahead in the field of mathematics. The statements of the great leaders have not been the basis for my studies for nothing. That is why the different religions need not actually be in each other's way; together the religions gave the world a present, the present of the Blue Swan. By way of the 3,000 WTPs, luck will soon start coming everyone's way."

VOC business and lifestyle magazine is the translation for a Dutch business community magazine called VOC zaken & lifestyle magazine. (www.voczakenenlifestylemagazine.nl)
